# ANNUAL CONFERENCE INTRODUCTION

---

## Update: SMRA All Virtual Meeting

As you may have heard, in order to prioritize the health and safety of our community, we have made the difficult decision to transition our 33rd International SMRA Conference from hybrid to fully virtual. We are leaving pictures of **Beijing** and the beautiful **Tsinghua campus** throughout this brochure to honor the city and the University who had graciously planned on hosting us this year.

## SMRA Mission Statement

An international group of scientists and clinicians devoted to the development, application and promotion of MR imaging techniques to visualize the cardiovascular system and to improve patient care.

## Annual Conference Objectives

This meeting is aimed at radiologists, technologists, physicists and other imaging scientists who want to increase their knowledge of Magnetic Resonance Angiography and Vascular Imaging. Plenary sessions with panel discussions will be focused on international collaboration, and clinical and basic research communication. Our Scientific program will run in tandem with educational sessions, 'hot-topic' discussions, and mentoring/career advice, as well as sessions dedicated to diversity and equality within the wider MRA community. In partnership with MICCAI, our Grand Challenge on "Machine Learning in Vascular Image Analysis" final winner will be selected at the meeting.

# ALL-VIRTUAL CONFERENCE VENUE

4

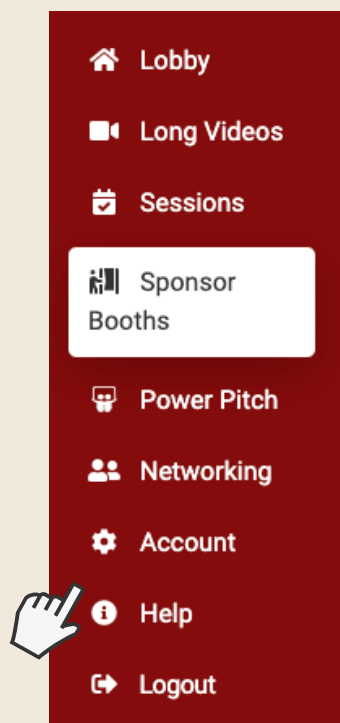

This year's meeting will be **fully virtual** and the committee has taken advantage of the interesting capabilities enabled by **Pheedloop** and **GATHER.TOWN**.

## Pheedloop Introduction and Use

Pheedloop, an innovative browser-based program, will be used to host the majority of this year's meeting.

- We prepared an instructional video with a quick tour of the platform, viewable in the "Help" tab.
- A week before the conference begins, attendees will be given access to the platform by email. Participants will enter the Pheedloop platform via a virtual meeting "Lobby".
- "Long Videos" in Educational Sessions are intended to be watched before the actual conference! Only the summary versions will be shown during the meeting.
- Each of the main "Sessions" will have an embedded zoom webinar. You will join automatically whenever you enter an ongoing session.
- Select "Sponsor Booths" to bring up the list of sponsors. You can view the posted material or send them a message via the public chat box on the right-hand side of the screen.
- "Poster Pitch" is a combination of an electronic poster and a four-minute talk.
- In "Networking", you can start a private conversation with any one of the attendees.
- Attendees can edit your profile under the "Account" tab. We ask all participants to complete the basic Account information and upload a photo.

## GATHER.TOWN

We will use **GATHER.TOWN** as the main venue for social gathering, Early Career Committee (ECC) events, sponsor booths and games and other activities. Make sure to set up a profile including your name and character before entering the SMRA 2021 main lobby.

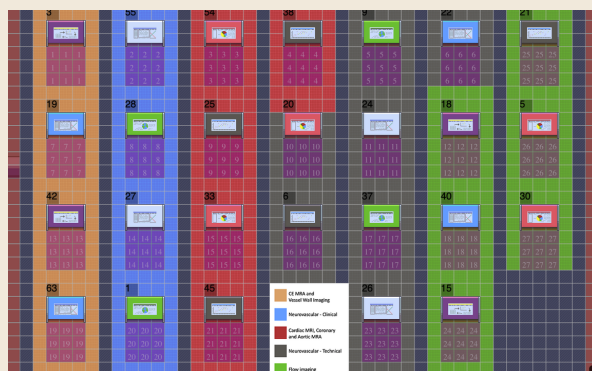

**Please visit as often as you can!**

### Foyer

Welcome to our **33rd Annual SMRA 2021 International Conference** and following last year's fully virtual event the first year we are hosting a form of hybrid meeting.

We are hoping this event provides a forum for great **Communication, Collaboration And Connection**. We realize nothing compares to a full in- person meeting and having those invaluable, serendipitous conversations. However, we are confident that the delegates that cannot attend in person, (most of us), will still feel connected using both the Pheedloop and GatherTown platforms.

I would like to thank and acknowledge the Scientific Co-Chairs: Dr. Xihai Zhao (Tsinghua University) and Dr. Chun Yuan (University of Washington) and their support teams who have worked so hard to make this **conference** a truly successful one. They have continued the tradition of hosting a great conference as we have had the 32 years before them.

This year a very exciting program has been constructed including a Carotid Vessel Wall Segmentation Challenge in partnership with MICCAI, symposiums that emphasize the 3Cs of Europe, Asia and North America, the inaugural eponymous Martin Prince lecture, and an enhanced fire-side series of events in a newly designed GatherTown with gaming planned for better communication.

Your presence is an indication that you are committed to making a positive difference in the SMRA community.

Enjoy the conference and we look forward to seeing you in **Los Angeles, California in 2022** for a much needed in person meeting.

Warm regards,

Dr. Giles Roditi  
SMRA President
